SUMMARY

Devops Engineer with IT experience focused on system deployment, troubleshooting, minimizing downtime, managing user access and permissions, maintaining local and inter-branch network connectivity, with hands-on labs in containerized applications.

EDUCATION

Alexandria Higher Institute of Engineering & Technology (AIET) 2019 – 2024

Bachelor of Electronics and Communication Engineering

TECHNICAL KNOWLEDGE (SELF-STUDY & PRACTICE)

- **DevOps Tools:** Docker (Containerization), Git, CI/CD Fundamentals.
- **Systems Admin:** Windows Server, Active Directory DNS, DHCP.
- **Amazon AWS:** Solid understanding and hands-on application of foundational AWS Cloud services, including EC2, VPC, S3, and core infrastructure concepts

PROFESSIONAL EXPERIENCE

Khalil Pharmacy *Dec 2024 – Present*

IT Specialist | Contract

- Provide technical support for 46+ pharmacy branches and 500+ users.
- Troubleshoot POS systems, inventory software
- Maintain and troubleshoot LAN and inter-branch network connectivity
- Manage user accounts and permissions via group policy.
- Coordinate with third-party vendors for hardware/software troubleshooting, maintenance, and system upgrades
- Analyze Windows Event Logs to diagnose, troubleshoot, and resolve system errors

TECHNICAL PROJECTS & FOCUS AREAS

Develop bash script: Resolved Sybase server memory errors and automated recovery protocols.

CV portfolio website: Developed and containerized a personal CV portfolio website using HTML, CSS, JavaScript, and Docker

Vaultwarden: Deployed containerized Vaultwarden (Self-Hosted Password Manager) via Docker as a PoC for centralized enterprise password management

Project related to Embedded Systems Nana degree program

Payment application: simulate payment process through atm card and server.

On demand traffic light control: using Atmega32 and simulated using proteus program.

CORE COMPETENCIES (JOB-RELATED SKILLS)

- **Problem solving:** Expertise in diagnosing hardware and software malfunctions.
- **Remote Troubleshooting:** Collaborate with end-users across remote sites to diagnose, troubleshoot, and resolve technical issues effectively.
- **Technical Research:** Continuous learning mindset with strong ability to research and resolve complex, non-routine technical issues

TRAINING & CERTIFICATIONS

- CCNA Training - We Training Center.
- Egypt FWD Embedded Systems Professional Nana degree program.

SOFT SKILLS

- Collaboration, Adaptability, Documentation.
